Projects

Personal Portfolio Website

- The personal portfolio website with all my details about the academics and professional skills.
- Project Link : <https://niraj-suryavanshi.github.io/n-suryavanshi.github.io/>

Weather Application System

- Weather Application mini project , which is valuable and less time consuming way where users can search for the weather condition .
- used php as a server side technology and MySQL as a database. also used Html, CSS and javascript for the frontend development.
- implemented signup and login functionality for the users.
- used Open map weather API for API call and receive all essential weather data in one response.

Contact Manager App

- Currently working on developing a fully functional project contact manager CRUD application using React.js , designed and built the front-end user interface using Semantic UI, ensuring a responsive and intuitive user experience.

Certifications

- [Oracle Certified Foundation Associate](#)
